

Table of Contents

<i>Preface</i>	v
1. Cell Structure	1
2. Classification of Bacteria	10
3. Growth, Survival and Death of Microorganisms	14
4. Cultivation of Microorganisms	18
5. Microbial Metabolism.....	21
6. Microbial Genetics	25
7. Immunology	29
8. Pathogenesis of Bacterial Infection.....	33
9. Normal Human Microbiota.....	37
10. Gram Positive Bacteria	39
11. Staphylococci	44
12. Streptococci and Enterococci.....	47
13. Enterobacteriaceae	52
14. Gram-Negative Bacteria.....	54
15. Haemophilus, Bordetella, Brucella and Francisella.....	57
16. The Neisseriae.....	59
17. Infections Caused by Anaerobic Bacteria	60
18. Legionellae, Bartonella and Unusual Bacterial Pathogens	61
19. Mycobacteria.....	64
20. Spirochaetes and Other Spiral Microorganisms.....	66
21. Mycoplasmas and Cell Wall defective Bacteria.....	69

22.	Rickettsia and Related Genera	70
23.	Chlamydia	72
24.	Antimicrobial Chemotherapy.....	75
25.	General Properties of Viruses.....	83
26.	Pathogenesis and Control of Viral Diseases.....	88
27.	Parvoviruses	91
28.	Adenoviruses.....	93
29.	Herpesviruses	95
30.	Poxviruses	99
31.	Hepatitis Viruses	101
32.	Picornaviruses (Entrovirus and Rhinovirus)	103
33.	Reoviruses, Rotaviruses and Caliciviruses	104
34.	Orthomyxoviruses (Influenza Viruses).....	105
35.	Paramyxoviruses and Rubella Virus	109
36.	Corona Viruses	115
37.	Rabies, Slow Virus Infections and Prion Diseases.....	117
38.	Human Cancer Virus	121
39.	Medical Mycology	126
40.	Aids and Lentiviruses.....	136
41.	Principles of Diagnostic Medical Microbiology	141
42.	Medical Parasitology.....	147
43.	Cases and Clinical Correlations	156
