

Contents

Preface..... v

Acknowledgementsvii

Chapter 1: Micromeritics

1. Determination of Particle Size Distribution Using Sieve Method.....1
2. Determination of Particle Size Distribution Using Microscope.....6
3. Determination of Bulk Density, True Density, and Void Porosity10
4. Angle of Repose14

Chapter 2: Rheology

5. Determination of Viscosity Using Ostwald's U Tube Viscometer18
6. Determination of Viscosity Using Brookfield Viscometer.....24

Chapter 3: Coarse Dispersion - Emulsion

7. Preparation and Determination of the Type of Emulsion and to Carry Out the Evaluation Study31
8. To Prepare and Evaluate the Stability of Emulsion by Globule Size Method35

Chapter 4: Coarse Dispersion - Suspension

9. Determination of Most Suitable Suspending Agent Among the Given by Comparing their Sedimentation Volume (F)41
10. To Determine the Degree of Flocculation (β) Induced by a Flocculating Agent in a Suspension.....44
11. To Study the Combined Effect of Flocculating Agent and Structured Vehicle on the Physical Stability of Suspensions.....47

Chapter 5: Drug Stability – Reaction Kinetics

12. Determination of Rate Constant and Half Life of Pseudo First Order Reaction.....51
13. Determination of Rate Constant of Second Order Reaction57
14. Accelerated Stability Studies of Aspirin63

Chapter 6: Interfacial Phenomena

15. Determination of Surface Tension by Drop Count Method70

16. Determination of Surface Tension by Drop Weight Method.....	75
17. Determination of Critical Micelle Concentration	78
18. Determination of HLB (Hydrophillic Lipophillic Balance) Value.....	82
19. Determination of Adsorption Isotherm	87

Chapter 7: Solutions

20. Determination of Partition Coefficient	94
21. Determination of Solubility (Titrimetric Method)	101
22. Determination of Solubility (Gravimetric Method)	105
23. Determination of pKa Value of Acetic Acid.....	109
24. Determination of pKa Value of Salicylic Acid.....	117
25. Determination of Dielectric Constant	122
26. Determination of Heat of Solution	129
27. Determination of Critical Solution Temperature.....	135

Chapter 8: Physico Chemical Characterization

28. Preparation of Calibration Curve of the Given Sample Using UV Spectrophotometer	138
29. Quantitative Analysis of Salicylic Acid Using Colorimeter	142
30. Quantitative Analysis of Paracetamol Using UV Spectrophotometer.....	148
31. Determination of Refractive Index of Solid Material	159

Chapter 9: Protein Binding

32. Protein Binding	165
---------------------------	-----

Chapter 10: Complexation

33. Analysis of Copper Glycinate Complex by pH Titration Method	176
34. Study of Complex Formation by Distribution Method	188
<i>Appendix</i>	198
<i>Bibliography</i>	208
